Swantown Marine Fueling Station Construction Update

Project completion expected in mid-June

The Port Commission approved the construction of a Marine Fueling Station at Swantown Marina at its September 12, 2016 Commission meeting. Construction of the new facility began in October. Completed work to-date includes:

- Underground tank installation
- New float construction and installation
- All in-water work is complete
- All identified environmental mitigation is complete

During construction, there will be several impacts to the public:

- The sewer pumpout facility is out-of-service until the fuel dock is operational
- The Swantown launch ramp will be closed for one week in mid-April for reconstruction of the roadway. The actual dates will be determined based on weather.

For information about the fuel dock project including presentations, reports and studies, and information on project public outreach and participation, visit the Port's website at www.portolympia.com.
